

# DAY IN THE LIFE

## SAMPLE SCHEDULE & ACTIVITY EXAMPLES

### *Grizzly Bear; Ages 10-13*

### GRIZZLY BEAR CAMP

Each day will have a theme of its own within our weekly camp themes.

8:45: <b>Check In</b>	Campers are arriving for the day! As we wait for everyone to arrive, campers will be engaged with journaling or some other relaxing activity.
9:15: <b>Morning Meeting</b>	A little longer on Monday, when we all learn each other's names, discover what camp is all about this week, and agree as a group on how we'll treat each other and the zoo. The rest of the week we will take this time to discuss what we will be doing for the day, expectations, and reinforce our goals.
9:30: <b>Zoo Exploration 1</b>	Visit ALL the animals! We'll either explore, do guided activities connected to our week's theme, and sometimes we might catch a keeper talk or another animal program! We plan these for before lunch because it's cooler, less crowded, and animals are usually more visible.
10:15: <b>Snack</b>	A little downtime to fortify ourselves.
10:30: <b>Zoo Exploration 2</b>	Second opportunity of the day to visit and explore zoo grounds. Doing two rounds of zoo exploration helps give us time to go to all the exhibit areas—and for Grizzly Bear campers, maybe even some peeks behind the scenes!
11:30: <b>Lunch</b>	Often joining other groups out on zoo grounds, campers will be able to socialize with those other campers outside of their group or age range.
12:00: <b>Team Building</b>	Games and activities designed to help everyone feel like a part of the group. Some of them involve full-body play, others are lower-key.
12:30: <b>Core Activity</b>	Each day will be punctuated with a distinctive activity that will connect campers to the zoo's mission and our weekly theme. Campers might build companion animal enrichment items to take home and try out, learn about and plant native plants, discover how scientists study animal behavior with ethograms, and more!
1:30: <b>Snack</b>	Afternoon fortification opportunity. Often snack is located on zoo grounds so we can view animals while we get the energy to continue our exploration.
1:45: <b>Project</b>	Grizzly Bear campers get to do a theme-connected project that spans the entire week. They'll have time every day to work on it.
2:45: <b>Team Building</b>	Games and activities can either be for the fun of movement or giggles, or even hide a teaching goal.
3:15: <b>Closing Meeting</b>	A chance to go over the day, and see what campers are looking forward to.
3:30: <b>Pickup, Hibernation Activities</b>	While campers are getting picked up one by one, open-ended activities are available to keep everyone busy.
